Hareketli - Katlanabilir Orta Bölmeler *Moving Seperator*

PVC Şerit Perdeler *PVC Strip Curtain*

Tanımı

iki komponentli, epoxy bazlı solventsiz self-levelling zemin kaplama malzemesidir.

Özellikleri

Su, rutubet, asınma, darbe, asit-alkali, deniz suyu ve çoğu kimyasal ve korrozif malzemelere karşı dayanıklı olup; sertleşme sonunda gayet sağlam ve yüksek mekanik dirençli sert bir film meydana getirir. Kolay temizlenir, bakteri barındırmaz, tozuzmaz, sağlığa zararı yoktur.

Kullanım Alanları

Laboratuvar, hastane, ilaç sanayi, gıda sanayi gibi tozumanın verimliliği ve sağlığı etkilediği tesislerde zemin kaplaması olarak kullanılır. Ayrıca, otomotiv sektöründe kapalı ticari araç kasalarının zeminin kaplanmasında kullanılabilir.

Kullanım Sekli

Ufak kutudaki serleştirci(B komponenti), büyük kutudaki ana malzemeye (A komponenti) dökülür ve homojen bir karışım sağlanıncaya kadar karıştırılır. Karışım 5-10 dakika dinlendirilir. stenilen kalınlığa uygun testere disli çelik mala seçilmelidir. Kaplama donmadan hava kabarcıklarının oluşumunu engellemek amacıyla kirpi rulo uygulaması yapılmalıdır. Hazırlanan karışım 1 saat içerisinde kullanılmalıdır. Yeni beton ya da çimento sıva uygulamasından sonra tatbik etmek için 21 gün beklenmelidir. Yağ, gres artıkları deterjanlı su ile temizlenir. Yüzeydeki harç artıkları temizlendikten sonra kuru zemine astar uygulanır.

Product Description

Epoxy Flooring Adhesives is a solvent-free two component polyurethane based filter adhesive.

Properties

Filter Adhesives resists against humidity, water and most of the chemicals.SG-122 Europol Epoxy Flooring Adhesives has very good filling capacity and thixotropic properties. It contains no solvents.

Application Area

Epoxy Flooring Adhesives is an adhesive for bonding filter paper to the filter cap. It can also be used as an adhesive in automotive industry, especially in trailers' wall, roof and floors.

By Hand

The resin component should be thoroughly stirred to incorporate any slight separation, whilst continuing stirring the contents of the hardener container should be added. Continue stirring until a homogeneous mix is obtained. The mixed material must be used within 30-40 minutes of mixing at 20°C.
